

Portrait Package Prices and Options

My goal in taking portraits is to combine a photojournalistic style (telling the story of you) with beautiful formal shots. Many people can get good photojournalistic shots. I strive to go above and beyond the candid shot and give you something that will capture the personality of the subject and do it in a visually aesthetic way.

I bring the studio to your house to make it both easier for you and more comfortable, especially for small children. I will also meet at an outdoor location if desired to take your portraits in a natural setting or one that has personal meaning to you.

Sitting fee: \$50.00

The digital negatives on CD and the rights to print them can be purchased **only with the purchase of a package** for an additional \$100.00.

The packages DO NOT have to be of the first picture taken. You can choose one or as many different poses/pictures as you would like to fill your package. I also can rearrange the packages to fit your needs.
