

Maija Photography
Maternity and Newborn Package
\$100.00

Maternity photography will help capture some of that excitement and anticipation of what life is like before your little bundle of joy is born. It's a beautiful experience that really should be captured so that the moments will always be remembered. Maternity photography is not only for the mother, but also the father and siblings of the new baby. Let Maija Photography capture this exciting and beautiful time as you start or continue your adventure in motherhood.

When the baby finally arrives, there is total enjoyment in just sitting, holding and watching them sleep. We are amazed at how tiny they are. This is a great age to take close ups of their little faces while they sleep, or having mom and dad kissing their head. Newborns are best photographed during the first 7-14 days or between 10-16 weeks. The "perfect" time for your newborn session depends on what you're hoping to achieve with the pictures and how you are feeling following the delivery. If you are looking for a true "newborn" look, where your baby is still curled up, very small and often asleep, then sooner is better. If you'd like more facial expressions, eyes that can follow a camera, some sweet smiles, then waiting a couple of weeks will be what you should do. Talk to Maija Photography if you'd like further information about when would be the best time for your newborn session.

The maternity and newborn package includes two portrait sessions. The first, when you are in your last trimester of pregnancy and we will work with you to schedule your second session. The sessions last from an hour to an hour-and-a-half. Maija Photography likes to capture all the cute faces and poses your baby makes, so she takes extra time to allow the baby plenty of breaks for eating, changing and cuddling between photographs. This also includes 15% off of packages and prints and 25 customized baby announcements.
